Flip Connect

Flip Connect is a sleek, built-in solution designed to integrate into your workspace seamlessly. Both units close flat and flush against the mounting surface, maintaining a clean, modern aesthetic. When needed, Flip Connect pivots upwards at an 85-degree wide angle to reveal its Power, Voice, and DATA Outlets, making it easy for users to plug in laptop adapters and other devices. One of the standout features of Flip Connect is its ability to remain closed during use. The outlets are equipped with brush edging that allows cables to pass through, enabling devices like computers, telephones, and multimedia equipment to stay connected while the unit remains discreetly concealed. This feature makes Flip Connect an ideal solution for managing connections in a clutter-free and functional manner. Self-contained and easy to install, Flip Connect is available in a range of customizable lengths to suit various workspace configurations. Designed for simplicity and ease of installation, it offers international compatibility and high technical capability. Combining sleek design with robust, high-quality construction, Flip Connect provides flexible and efficient connectivity tailored to meet your specific needs.

OVERVIEW

- **Rated for 120V.**
- **Compatible with NEMA receptacles and hardwired power configurations.**
- **Pre-wired for Power, Data, Audio, and Video connectivity.**
- **Housing is safely grounded aluminum to prevent electrical hazards.**
- **Standard 12 AWG / 14 AWG wiring options available upon specification request.**
- **Includes a built-in box with a manual flip-open mechanism.**
- **Requires a minimum tabletop thickness of 10 mm.**
- **Available in configurations from 2 to 20 modules.**
- **Available in black, silver, and white finishes.**
- **Features an 18W USB Type-A adaptive fast-charging port.**
- **Features a 83W USB Type-C port, optimized for high-speed laptop and tablet charging.**
- **Internal configurations are fully customizable to meet specific project requirements.**
- **Installs flush with the tabletop surface using a standard cut-out.**

Turn Connect Motorized

Turn Connect Motorized Built-in Socket provides an advanced, functional solution for modern office and conference room environments. Featuring a quiet, efficient motor, the rotary mechanism opens with a simple press of the green button, granting easy access to Power, DATA, and AV Connections. Upon closing, the robust, soundless motor smoothly retracts the sockets with the press of the red button, keeping them discreetly concealed to maintain a clean, elegant work surface. Designed for collaborative environments, the Turn Connect Motorized allows seamless access from opposite sides of the table, making it ideal for multi-user settings. This self-contained system is easy to install and comes in a range of customizable lengths to accommodate various workspace configurations. With an emphasis on simplicity, reliability, and international compatibility, Turn Connect Motorized integrates advanced technical capabilities to provide a flexible, high-quality connectivity solution. Its sleek design and durable construction ensure that it meets the evolving demands of modern office spaces and meeting environments.

Pull Connect Motorised

Pull-Connect Motorized System is a sleek and sophisticated vertical power module that merges practical functionality with minimalist design. Featuring a soundless motor, it extends and retracts smoothly at the touch of a button, allowing for effortless operation while maintaining a clutter-free workspace. Designed to fit into a standard 95 mm grommet, it provides a compact, all-in-one solution for power connectivity, making it ideal for various workspace configurations. The Pull-Connect Motorised System also offers the option of integrated wireless charging on its top surface. This innovative feature allows you to charge your mobile devices even when the unit is retracted—simply place your device on the charging pad, and it begins charging instantly. This combination of modern charging capabilities ensures efficiency, reliability, and flexibility, making the Pull-Connect Motorised the perfect solution for dynamic and modern workspaces.

OVERVIEW

- Rated for 120V.
- Compatible with NEMA receptacles or hardwired power configurations.
- The aluminum casing is safely grounded to prevent electrical hazards.
- Standard 12 AWG / 14 AWG wiring options available upon specification request.
- The motorized mechanism features an infrared sensor.
- Provides Power, Data, and AV to the desktop.
- Available in black, silver, and white finishes.
- Easy to install, fitting into a 95 mm grommet hole.
- Compatible only with Power sockets, Wireless charging, Switches, and USB charging.
- Features an LED light that blinks when the unit pops up.
- An inbuilt sensor prevents popping up if an object is present above it.
- Three-second power-on function prevents incidental pop-ups.
- Includes an 18W USB Type-A adaptive fast-charging port.
- Includes a 83W USB Type-C port, optimized for laptop, tablet, and smartphone charging.
- Internal configurations are fully customizable to meet specific project requirements.
- Installs flush with the tabletop surface.

Smart Connect

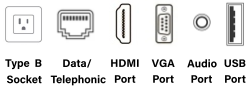

Smart Connect from Connect System is a cutting-edge solution designed to provide Power, DATA, and AV Connectivity at meeting tables, with easy access from both sides. Featuring sockets placed on all sides, it ensures that all participants can conveniently plug in and stay connected, promoting seamless collaboration. The standout feature is its innovative hydraulic pop-up system, which rises effortlessly with a touch of your finger, offering smooth, easy access to connections. When not in use, the unit retracts neatly back inside, leaving the workspace clean and clutter-free. Additionally, Smart Connect offers the option to place a laminate or veneer finish on top, completely concealing the unit when not in use. This feature allows the system to blend seamlessly with the table's design, ensuring a sleek and polished appearance while keeping connections hidden until needed. This combination of practicality and elegance makes Smart Connect the perfect choice for meeting rooms and boardrooms.

OVERVIEW

- **Rated for 120V.**
- **Compatible with NEMA receptacles or hardwired power configurations.**
- **Pre-wired to support Power, Data, Audio, and Video connectivity.**
- **The aluminum casing is safely grounded to avoid electrical hazards.**
